# Climate indices Eastern European perspective

## Workshop Climate indices – past activities and next steps

**Vladimir Djurdjevic**

*Faculty of Physics, University of Belgrade*

*September 27, 2021*

The IS-ENES3 project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 824084

- The workshop is a part of the IS-ENES3 project (<https://is.enes.org/>)
  - WP3-NA2: Community engagement
    - ... widening the user base through training, engaging the community in co-constructing standards and expressing needs, and engaging the younger generation in interdisciplinary approaches. Target users will be the climate researchers and the vulnerability, impacts and adaptation (VIA) researchers.
- Due to COVID-19 decision was made to switch from face 2 face to online format (meetings, survey and interviews)

## **The goal of the workshop:**

The workshop will evaluate and review the usage of existing indices and explore the need for additional ones in these **broader and new communities**.

## **Workshop main output:**

Report on climate indices

## **The past steps:**

- Initial meeting
- Online survey
- Online interviews
- Report drafting

- The online survey was run in June
  - Topics that were covered:
    - Indices definitions*
    - Data sources and calculation practices*
    - Software (calculation and visualization)*
    - Indices application*
    - Gaps, needs, recommendations*
- The online interviews were conducted during June and July
- The report was drafted during August and September

## Next step

- Final meeting to present main findings (today)
- Additional round of report review
  - if you are interested to review the report please send mail to [vdj@ff.bg.ac.rs](mailto:vdj@ff.bg.ac.rs) and [aleksandra.krzic@gmail.com](mailto:aleksandra.krzic@gmail.com) or leave us message in chat!
- Finalizing the report during October
