

IS-ENES3 Overview

Sylvie Joussaume (IPSL-CNRS)
Bryan Lawrence (UREAD-NCAS)

January 2019 – December 2022

22 partners from 11 countries

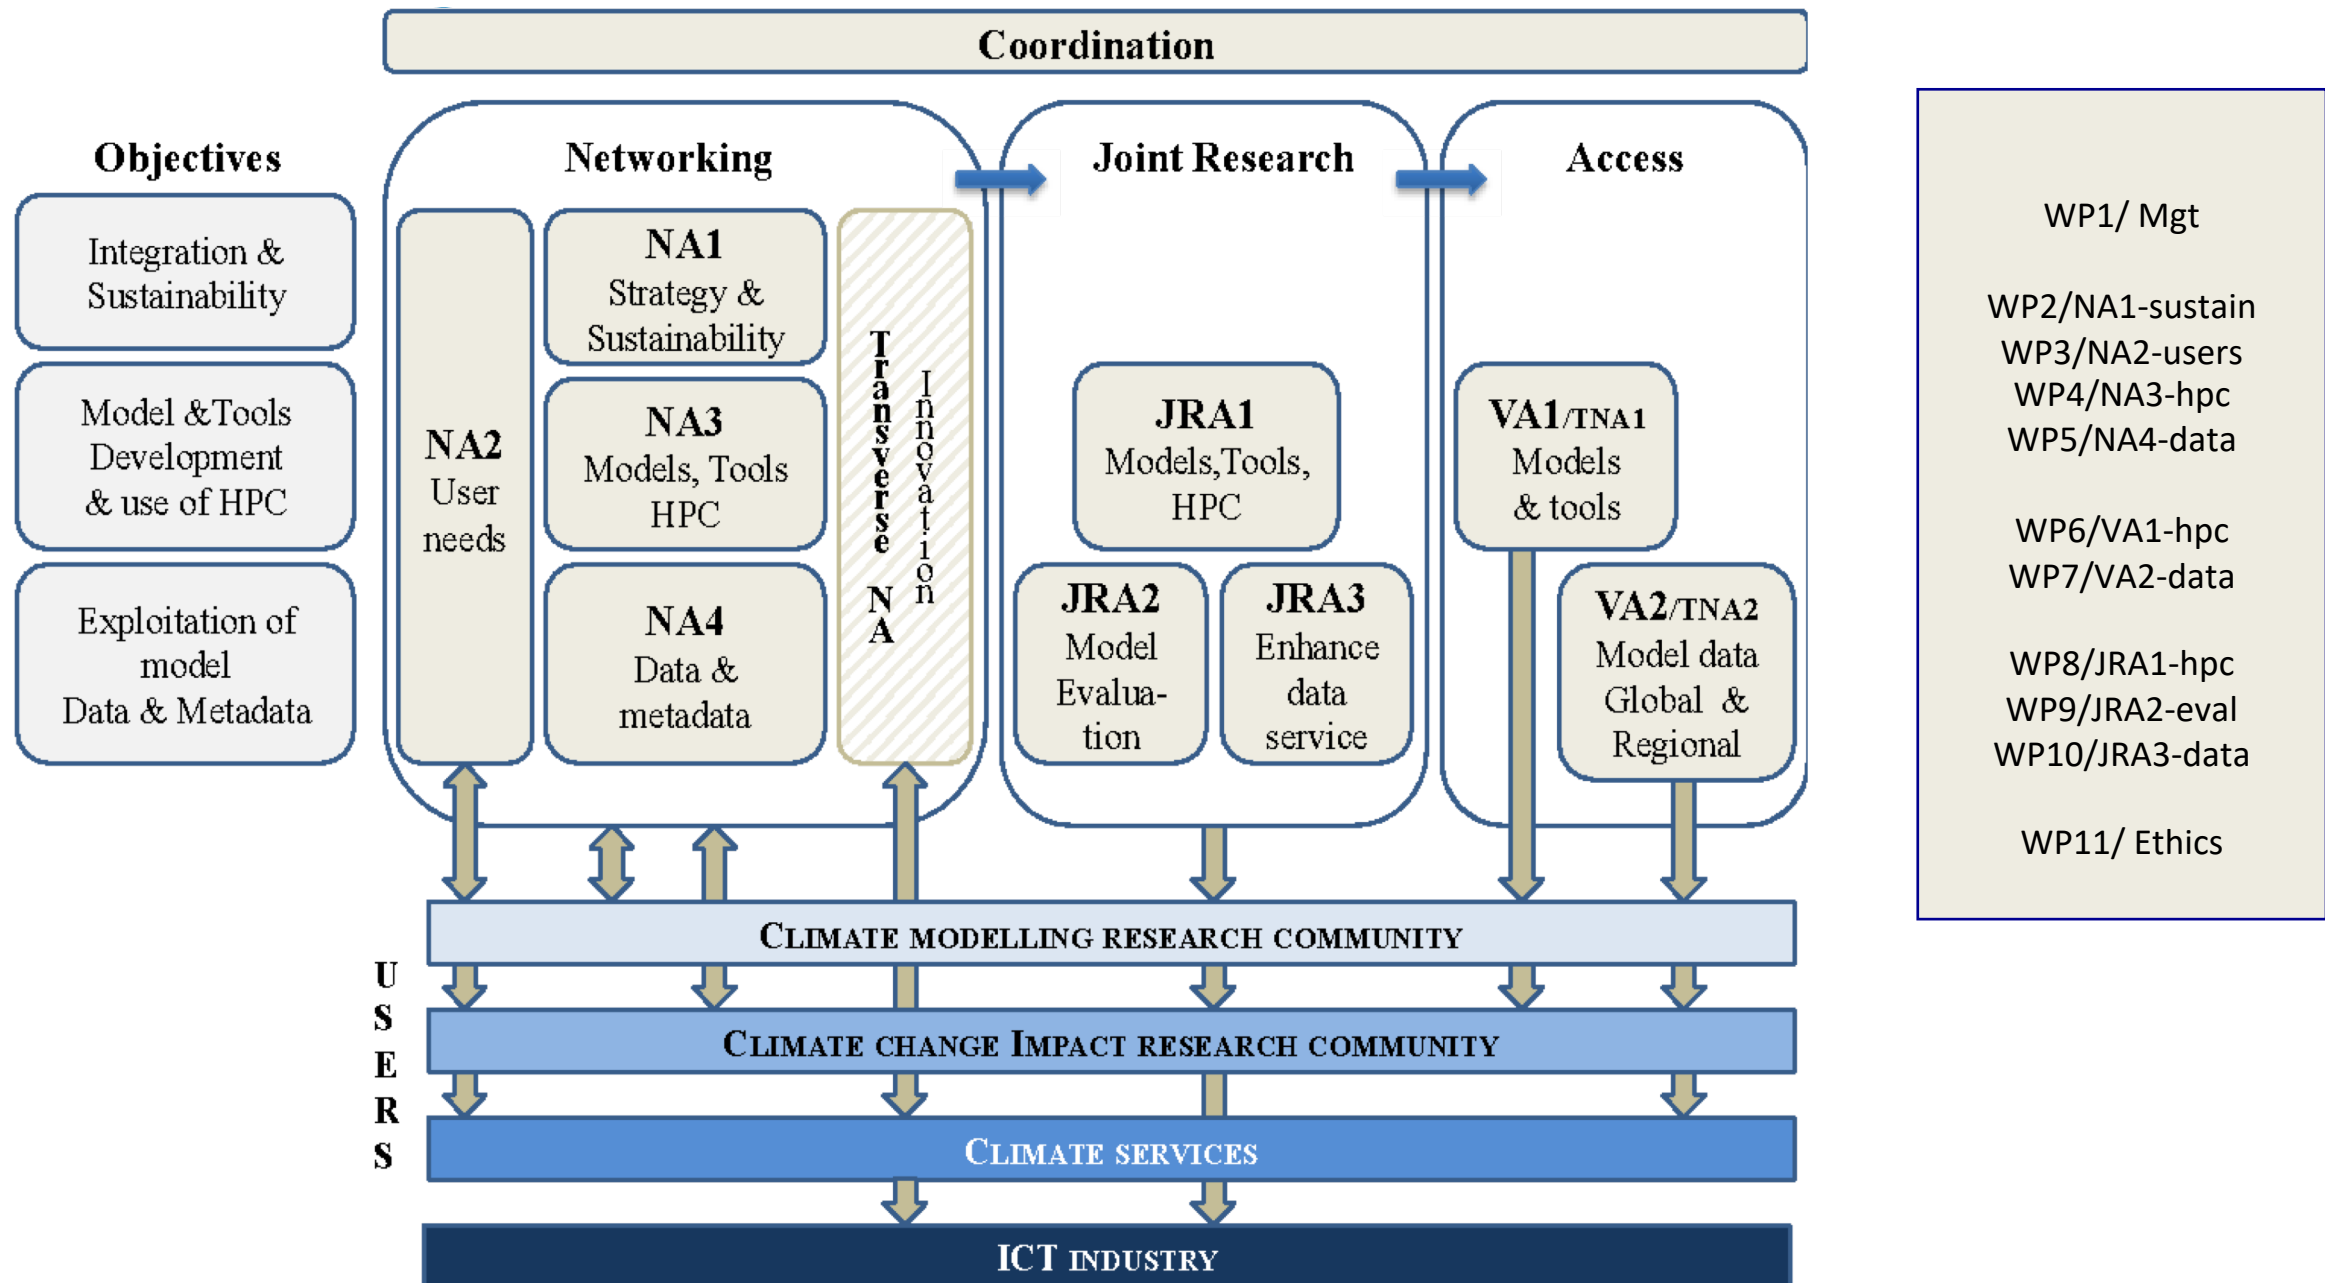

01/07/2020-31/12/2021: Second Reporting Period

3 main objectives:

- Pursue the integration of the climate modelling community & prepare the sustainability of the research infrastructure
- Foster common development of models and tools and efficient use of HPC
- Support exploitation of model data by the Earth system science, the climate change impact and the climate service communities

**New Project Officer:
Emiliano Carozza
At Research Executive Agency**

Objective 1: Integration & sustainability

Networking activities

NA1-sustain

Governance: Task Forces (data and HPC) & ENES scientific officer

Prepare for sustainability: scoping, designing & possibly implementing

Innovation cross-WP activity: Technology and Societal innovation

Revise infrastructure strategy for 2022-2032

NA2-users

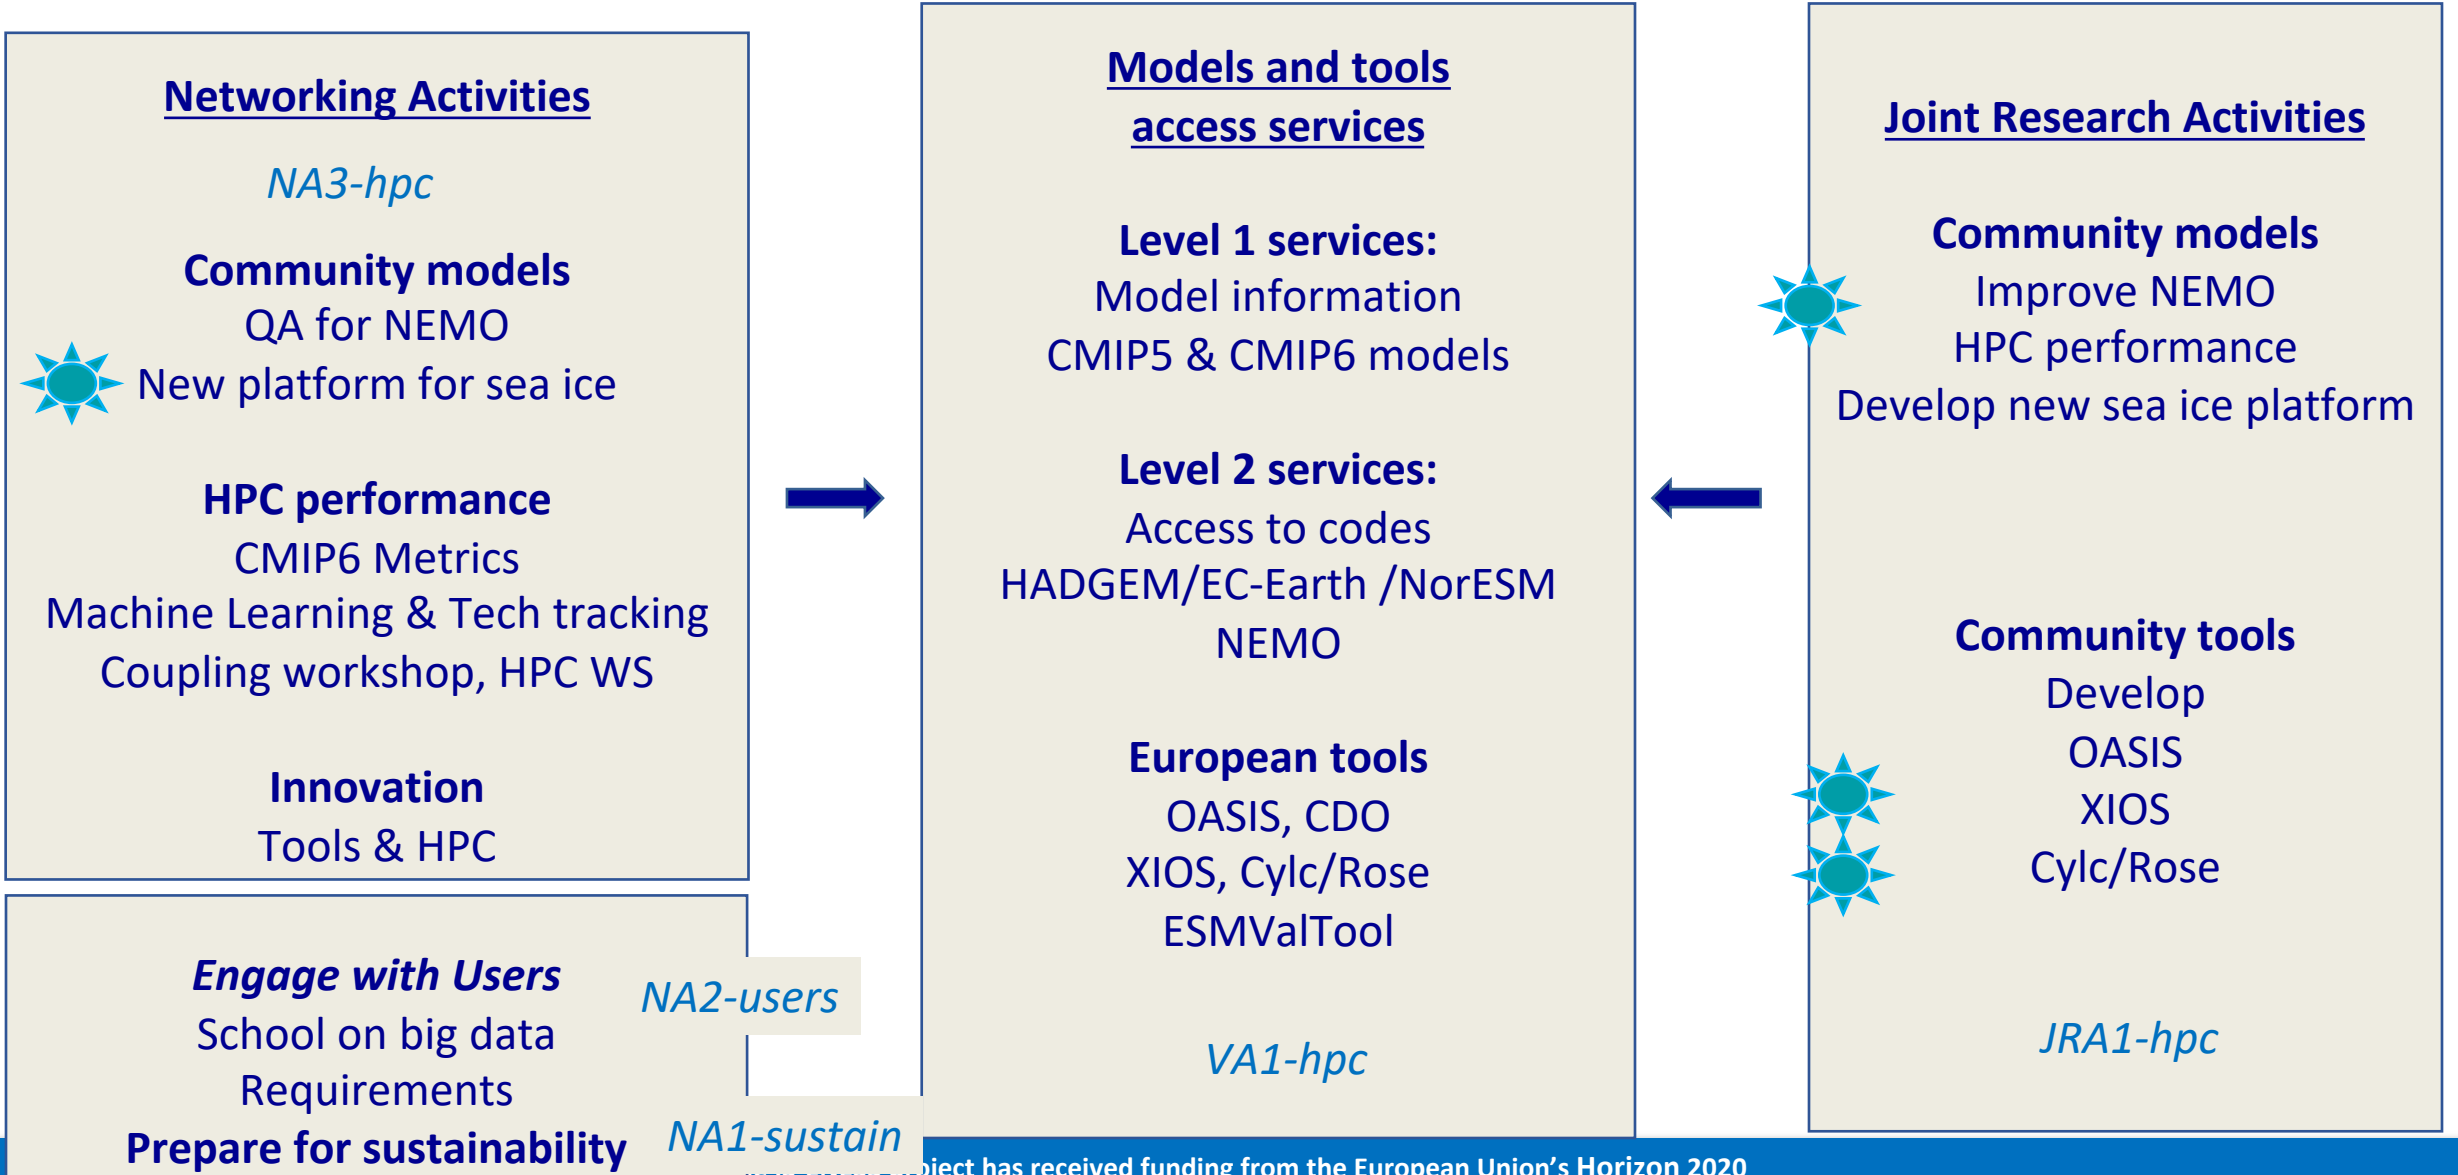

Engage with users: workshops & training

Widen the user community: VIA, Climate services

Nurture the existing community

Objective 2: Models, tools and HPC activities

Objective 3: Data infrastructure

Joint Research Activities

Networking Activities

NA4-data

Data & metadata

Needs, priorities, standards, future architectures for ESGF and ES-DOC

Evaluation

Standards for diagn. Tools
Standard on evaluation scientific provenance

Data access services

ESGF data access and publication

Long-term archival, PI, WDCC

Climate4impact portal

Compute services

For large data pools and evaluation diagnostics

Service on Data and metadata standards

CF & Data Request

Model documentation

ES-DOC

VA2-data

Data infrastructure development

Improve:

Software stack
Computing layer
Data standards
ES-DOC

Climate4impact portal

JRA3-data

ESM evaluation developments

Based on ESMValTool

Improve

Extend functionalities

Adapt to standard interfaces

Couple to ESGF

JRA2-eval

Engage with Users

Trainings, schools
Requirements

NA2-users

Innovation

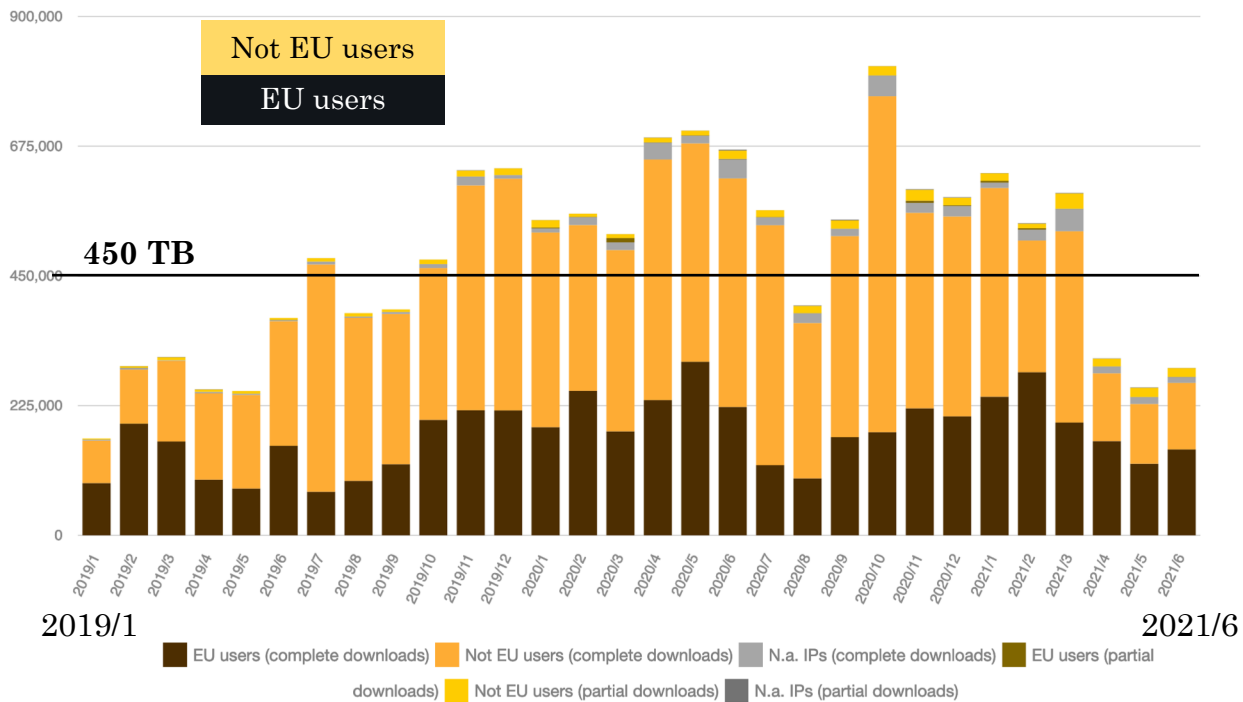

Climate services & C3S

NA1-sustain

Prepare for sustainability

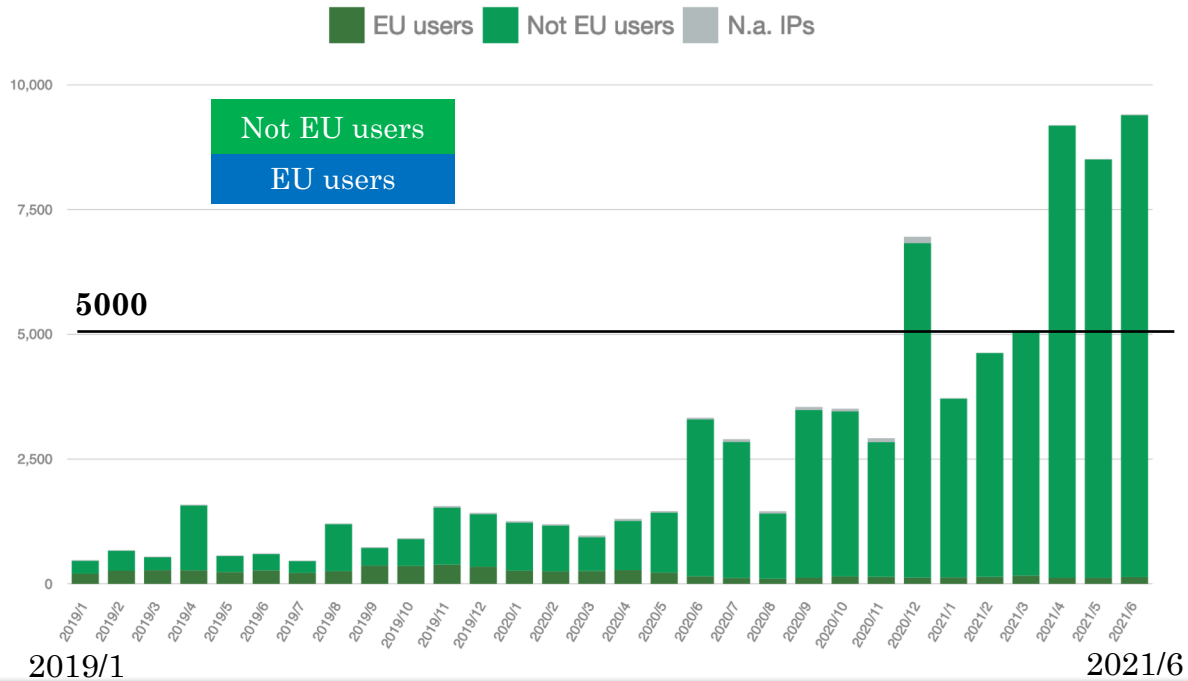

IS-ENES3 KPIs (from Jan 2019 to June 2021)

Number of distinct clients

Downloaded data volume [GB]

European & International context

European

- **New projects on next generation ESMs (2021-2025): NextGEMS** (B. Stevens) & **ESM2025** (R. Sférian) 
- **Data policy:** open access, EOSC - collaborations with EGI (lead CMCC) and EUDAT (lead DKRZ)
- **Copernicus C3S:** New project on operational access to CMIP/CORDEX from ESGF (PI IPSL)
- **ENVRI** (environmental RI): Collaboration (SJ & FA) – new proposal on climate related risks (PI UKRI)
- **DestinE:** towards very high resolution climate models for adaptation policy
- **EuroHPC:** HPC pre-exascale machines available (LUMI early 2022)
and HPC exascale plans (2023-2024)

International

- **CMIP:** New WCRP CMIP International Project Office, hosted by ESA – starting September 2021
- **ESGF:** New team selected by DOE

Main structure of agenda

General session: ALL

Overview & Sustainability

New ESM projects

Carbon footprint

Grant Agreement issues

Topic session: one at least

Model evaluation /

Data and metadata /

Models, tools, hpc

Status, Highlights, Cross-WP issues

Introduce “Around Coffee” parallel sessions

Wednesday morning: Cross-WP issues & Plenary

Wednesday afternoon: Around Coffee parallel sessions - open slots

Although a virtual GA: facilitate discussion!! Lunch time: Gathertown

THE CONSORTIUM

Coordinated by CNRS-IPSL, the IS-ENES3 project
gathers 22 partners in 11 countries

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N°824084
